Figure 1 illustrates a multi-tenant network architecture. It shows a flow from two input blocks to two intermediate blocks, which then merge into a final output block. The input blocks are LPWA (T=6, C=0, M/N=408) and NGWA (T=7, C=5, M/N=458). The intermediate blocks are NGWA (T=0, C=0, M/N=458) and SDWA (T=7, C=3, M/N=458). The final output block is SDWA (T=5, C=5, M/N=458).
